TO WHOM IT MAY CONCERN;

In taking advantage of the numerous rebates offered by WPS, the Budgetel Inn of Green Bay has used US Lamp as a supplier for energy efficient lights and ballasts. US Lamp representatives have been very knowledgeable of their products and materials needed to convert our lighting and unlike out of town sales persons who won't even leave a card or phone number, US Lamp has backed their products and offered installation guidance. I would recommend US Lamp to anyone interested in doing their part to reduce energy consumption to help our environment by switching to efficient lighting.

Sincerely,

A handwritten signature in cursive script that reads "Craig P. Olson".

Craig P. Olson
