Randy Johnson  
US Lamp Inc.  
3600 Velp Avenue, Suite 1  
Green Bay, WI 54313

Dear Randy,

Your Company's proposal for implementing the energy saving lamps in our 60,000 square-foot warehouse with T8 fixtures has been a very positive transition. In deciding to go forward with Phase I of our project, US Lamp was aware of our needs and followed through until our goals were met. The on-going communication I experienced from your staff (especially Marv & Joe) to the delivery of the product and the professionalism of the install (Nass Electric) helped the project appear to be quite seamless.

Enzymatic Therapy will continue to pursue other phases of our lighting sources and intend to work with US Lamp in providing their technical expertise and service.

We are excited to see our energy and cost savings benefits along with a quick payback for this project and would recommend US Lamp to others.

Sincerely,

Tammy Meyers  
Administrative Assistant and  
Lighting Team Project Team Member
