November 5, 2002

To Whom It May Concern:

Randy Johnson, US Lamp, recently assisted the school district in a lighting use study. Based upon the results, he recommended a project through the Focus on Energy Program to install lighting sensors. The project is projected to save the district over \$20,000 annually in electrical costs.

I find Randy Johnson trustworthy, honest, and knowledgeable. He is not only aware of available energy savings programs, but state of the art technologies as well.

If you are looking for an innovator and leader in the lighting field, I highly recommend Randy Johnson and US Lamp.

Yours truly,

John R. Keller
Assistant Superintendent—Business Services
