To Whom It May Concern:

This is a letter of recommendation for US Lamp, Inc. in Green Bay, WI.

US Lamp has worked with the Kimberly Area School District for the past two years on a variety of lighting project work. They have provided a comprehensive lighting retrofit project for J.R. Gerritts Middle School. US Lamp has also provided lighting design work for several floors of classroom remodeling at Mapleview Elementary School. They are currently working on a gym retrofit project for that same school. We are also exploring other energy conservation opportunities for lighting with them, right now.

I have used US Lamp for consulting services, as well, since I have found their technical expertise to be superior to that of electrical and consulting engineers that we often work with. Their comprehensive knowledge of various lighting products and solutions has allowed us to utilize their expertise to fine tune and maximize the energy savings of lighting upgrades we are doing. For these reasons, we have continued to work with US Lamp as a business partner, with our district.

I have found Joe Daniels and the other individuals at US Lamp to be technically knowledgeable and committed to working with us to deliver a high performance solution. I would highly recommend this company to anyone considering lighting upgrades and high performance lighting solutions.

We look forward to working with US Lamp in the future for the services they provide for our district.

Sincerely,

Jim Zwiers
Supervisor of Building and Grounds
Kimberly Area School District
