To Whom It May Concern:

US Lamp, Inc. has been our lighting vendor for the past sixteen years. Randy Johnson and his staff are very professional to deal with and well educated in the areas of energy efficient lighting technologies, lighting design, and applications.

In addition to our day-to-day lighting needs, we recently completed a remodeling project in our building. This project involved replacing and retrofitting our existing lighting system to take advantage of more energy efficient equipment. The building is properly lit and is aesthetically pleasing to the people in our office. Since the completion of the project, I have observed a significant decrease in our monthly electrical bill.

US Lamp, Inc brought to our attention utility and state energy programs that were available. This helped us take advantage of any additional savings that applied to our project.

I would highly recommend that any organization consider US Lamp, Inc to improve their current lighting system and for general lighting needs. If you would like to contact me for further information, I can be reached at 920-436-7816, extension 4261.

Sincerely,

Mark Petasek
Maintenance Supervisor
