To Whom It May Concern:

It is with pleasure that I write this letter about our experiences working with US Lamp, Inc. of Green Bay. We, at St. Norbert College, have been working with the employees of US Lamp for a number of years. Throughout our relationship, we have found everyone on their staff to be extremely professional, knowledgeable, and helpful.

Most recently, we have been interested in pursuing energy conservation lighting upgrades for our sports complex. This complex now utilizes 1970's lighting technology and would be a prime location to show off the advantages of the newest energy-saving lighting. We are hoping to utilize this project as an example, or show piece if you will, to demonstrate the advantages of this type of upgrades to our Board of Directors. This project would be in conjunction with the *Wisconsin Focus On Energy* program. Randy Johnson and his staff at US Lamp have been extremely helpful in designing and pulling this project together for us.

We plan to continue to use US Lamp for our future design projects, as well as for our daily needs. I highly recommend US Lamp to anyone seeking someone professional to design and implement retrofit or total lighting projects.

Sincerely,

A handwritten signature in cursive script that reads "Lewis Pullen".
